

Name and surname of the patient:

PESEL or passport number:

Intake screening interview before vaccinating an adult against COVID-19

The questionnaire should be completed before visiting a doctor. Answering the following questions will help your doctor decide if you can be immunized against COVID-19 today. Your answers will be used by your doctor when qualifying for vaccination. The doctor may ask additional questions. In case of uncertainty, ask the healthcare professional responsible for the vaccination for clarification.

No.	Initial questions	Yes	No
1.	Have you had a positive genetic or antigen test for SARS-CoV-2 in the last 4 weeks?		
2.	In the last 14 days, have you had any close contact or live with a person who was tested positive for the SARS-CoV-2 genetic or antigen test or live with a person who had symptoms of COVID -19 during this period? (listed in questions 3–5)?		
3.	Have you had an increased body temperature or fever in the last 14 days?		
4.	Have you had a new, persistent cough or increased of chronic cough due to a recognized chronic disease in the last 14 days?		
5.	In the last 14 days, have you experienced a loss of sense of smell or taste?		
6.	Have you returned from abroad in the last 14 days (red zone)?		
7.	Have you received any vaccine in the last 14 days?		
8.	Do you have a cold or diarrhea or vomiting today?		

If the answer to any of the above questions is positive, vaccination against COVID-19 should be postponed. You should come to the vaccination when all answers to the above-mentioned the questions will be negative. In case of doubt, please contact the vaccinating physician.

No.	Pytania dotyczące stanu zdrowia	Yes ^a	No	I don't know ^a
1.	Do you feel sick today, is there any aggravation (exacerbation) of your chronic disease?
